

U.S. Application No. 09/900,224, filed July 6, 2001
Attorney Docket No. 17453US02
Amendment dated December 31, 2007
In Response to Office Action mailed July 31, 2007

Amendments to the Specification

In the specification, please replace the paragraph on page 4, lines 20-34 with the following amended paragraph:

FIG. 1 is a block diagram of a parameter concealment embodiment of the present invention. A first device 10 generates and transmits a parameter signal 14 and a control signal 16 to a second device. The second device includes a parameter concealment logic block used to conceal device input parameters passed between the two devices. The parameter concealment logic block receives the parameter signal and the control signal and performs a transformation on the parameter signal according to the control signal in order to generate a destination parameter signal 20. The destination parameter signal is transmitted to destination registers 22 within the device. In one embodiment of a parameter concealment logic block according to the present invention, the destination parameter signal in the destination registers is transmitted as a feedback signal 24 to be reused in the parameter concealment logic block.
